## EXPERIENCE

### Web Developer — *Freelance*

March 2016 - Present

I've been working on a variety of projects lately: Jekyll sites hosted with CloudCannon, WooCommerce sites, custom WordPress themes, etc. You can see some of the projects at bradonomics.com/portfolio.

### Web Developer — Chiang Mai, Thailand — *Iglu*

March 2014 - March 2016

As a web developer I mostly built custom WordPress themes. Some projects were simple brochure sites with little complexity, others were large projects with custom post types, custom taxonomies, and other such custom requirements. In most cases these themes were built using Gulp (for Sass processing, browser refresh, and various other tasks), and were version controlled with Git.

I also did the server setups. Most clients already had their domains registered but if it wasn't, I'd register the domain, setup the DNS, setup the server, and install WordPress.

### AMHS Technician — Oceanside, California — *Telos Corporation*

August 2007 - October 2008

### Technical Support — Portland, Oregon — *Integra Telecom*

June 2006 - March 2007

### Technical Support — Portland, Oregon — *TEKsystems*

May 2005 - April 2006

### Network Administrator — Kaneohe Bay, Hawaii — *Omega*

March 2004 - July 2004

**DMS Technician** — Kaneohe Bay, Hawaii — *Computer Sciences Corporation*

October 2002 - March 2004

**Small Computer Systems Specialist (4066)** — *United States Marine Corps*
